Firestone
World's Number 1
Air Spring.
FIRESTONE INDUSTRIAL PRODUCTS COMPANY

IDENTIFYING AIR SPRINGS

Air Spring Components

Air Spring Styles

Rolling Lobe / Piston Type

Double Convoluted

Triple Convoluted

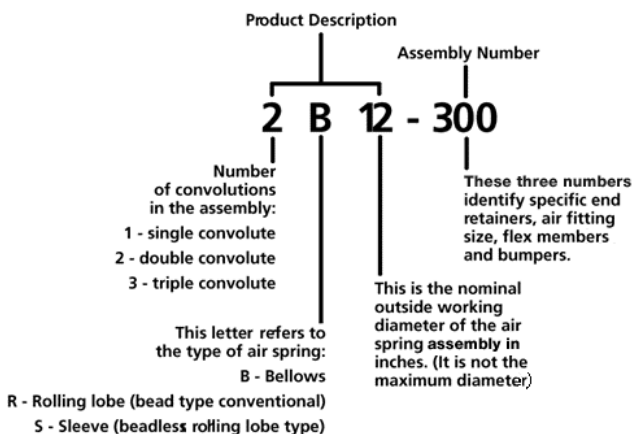

Single Convoluted

Choosing The Correct Replacement Air Spring

1. If the OE assembly part number is known, use the cross-reference in the back of this catalogue to find the correct replacement.
2. If the OE assembly number is not known, then examine the old spring and compare dimensions against the Schematics shown against each air spring on the following pages.

Caution: Numbers moulded on the rubber bag are NOT the assembly part numbers. Bags with same numbers are used with different combinations of top plates and pistons. They may or may not have an internal rubber bump stop.

Goodyear Unique Product Identification System

IDENTIFYING AIR SPRINGS

Product Label

1R12-586 is the Goodyear part number for this assembly, which includes top/bead plate, bellows and piston.

Goodyear

Flexible Member/Bellows Number

Caution: Numbers moulded on the rubber bag are NOT the assembly part numbers. Bags with same numbers are used with different combinations of top plates and pistons.

Firestone

In this example W01-M58- **6339** is the Firestone assembly part number.

REFER TO THE BACK PAGES OF THIS SECTION FOR A CROSS-REFERENCE LISTING OF OEM TO ATAP PART NUMBERS.

Goodyear Bellows Style

Flexible Member/Bellows

In this style of air spring the last 4 to 5 digits of the bellows part number, i.e. **8017E** are used as the **Goodyear** part number for identification and reordering purposes.

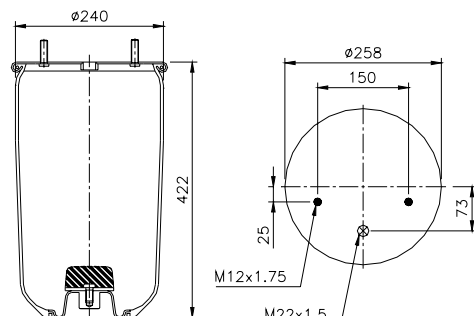

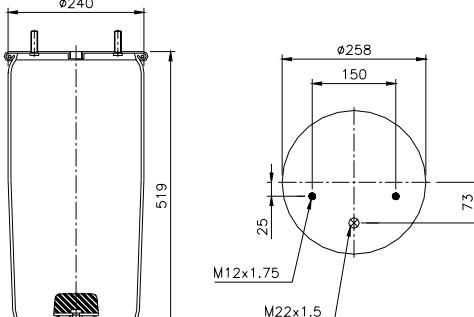

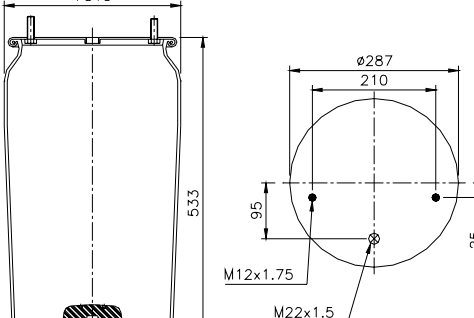

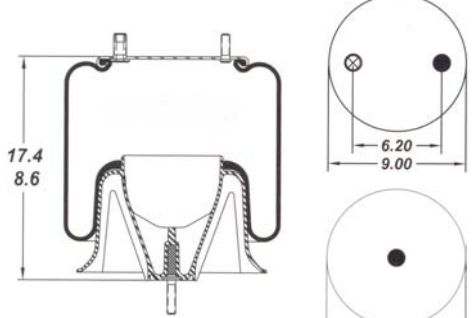

ContiTech Bellows Style

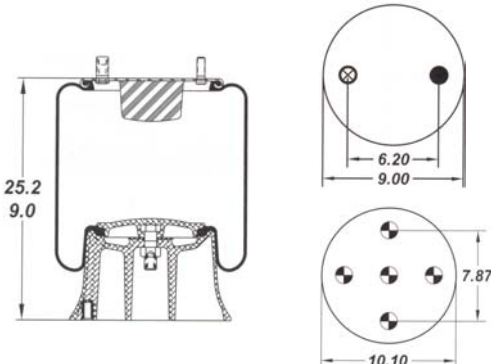

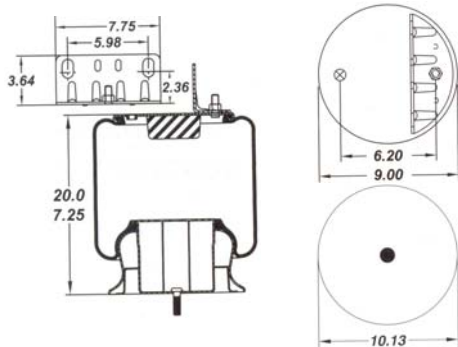

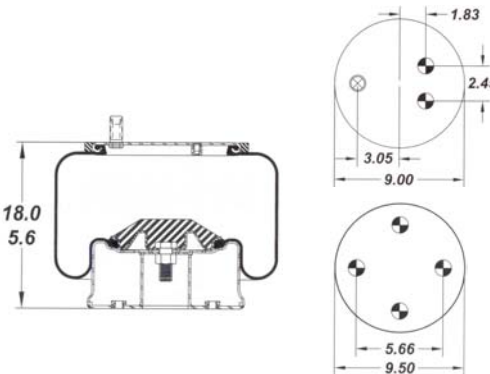

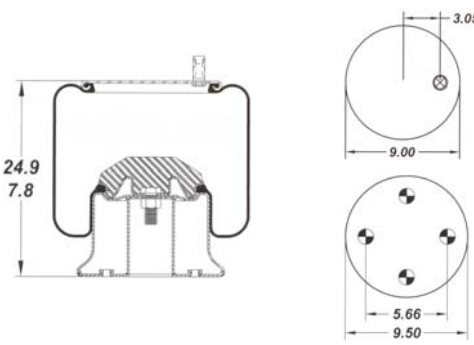

Flexible Member/Bellows

In this example the **ContiTech** part number **928N** moulded into the bag is the part number used for identification and reordering purposes.
